General Information

Things to Know Before Using This Manual

The information and specifications included in this publication were in effect at the time of approval for printing. Honda Motor Co., Ltd., reserves the right, however, to discontinue or change specifications or design at any time without notice and without incurring any obligation.

Accessories Precautions

The GPS antenna is located in the dashboard. Metallic front or side window tinting can seriously degrade or obstruct GPS reception.

Signal noise from devices such as radar detectors, vehicle tracking devices, remote starters, and additional amplifiers can disrupt the navigation system. If you install any such item, install it away from the navigation display and antenna.

Important Safety Information

WARNING

Using the navigation system while driving can take your attention away from the road, causing a crash in which you could be seriously injured or killed.

Only operate system controls when the conditions permit you to safely do so.

Avoid focusing on the screen or manually operating the system controls while driving. Certain on-screen controls are disabled when driving; however, most of the voice commands continue to function. Pull to the side of the road if you need to devote more attention and time to look at the screen or access additional menus. Route guidance may conflict with street closures, road construction, detours, and out-of-date map data.

The system itself may also have limitations. Verify route information by carefully observing roads, signs, and signals. Always use your own judgment and obey traffic laws.

- ! Upon removing this vehicle's navigation display, please reuse, recycle, or dispose of as hazardous waste.
- ! Clean the screen with a soft, damp cloth. You may use a mild cleaner intended for use on navigation screens.

The navigation system reboots by itself (returns to the opening screen).	A reboot can be caused by extreme temperatures or shock from bumpy roads, and does not necessarily indicate a problem. If this happens frequently, please see your dealer.
How do I report new streets, landmarks, etc. that are not incorporated in the map data?	For reporting issues with the database or places/landmarks: Visit https://mapcreator.here.com/mapcreator For details, refer to the Help pages of the website.

The location of my vehicle displayed on the map screen is not correct.	The signal reception can easily be interrupted or interfered with by electronic devices mounted near the navigation unit, tall buildings, motorway overpasses, tunnels, etc.
My clock frequently changes forward and backward by one hour.	The clock setting is automatically updated based on your GPS location. If you are driving near a time zone border, the automatic update likely is the reason.
